WHO WE ARE

LEADING MANUFACTURERS OF POOL AND HOT TUB ENCLOSURES

Abrisol has been a leading company in the pool enclosure sector for more than thirty years, becoming one of the most recognised brands in Europe. Our goal has always been to manufacture high-quality pool and hot tub enclosures that enhance our clients' quality of life by creating personalised spaces tailored to their needs and preferences, rather than offering prefabricated solutions.

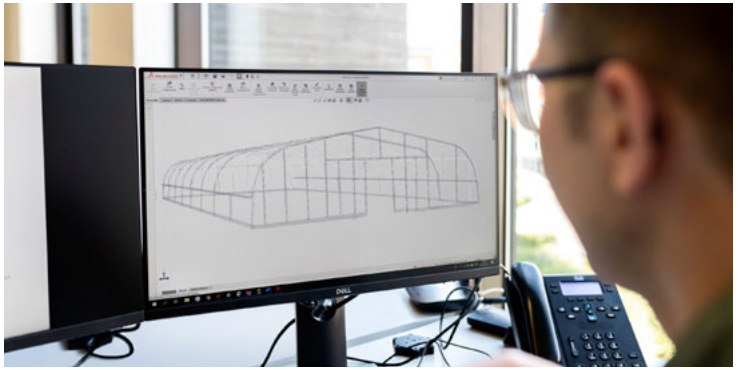
With over 10,000 pool enclosures installed, the quality of our products, our high level of customisation, and our commitment to excellence are the pillars that have made us the first choice of thousands of clients throughout Europe.

DESIGNED AND BUILT BY US

At Abrisol, we design, manufacture, and install nearly all of our pool and hot tub enclosures. As manufacturers, we control every step of the process—from your first contact with us to the final installation of your enclosure.

CUSTOM-MADE SOLUTIONS

At Abrisol, we understand that every project is unique. That's why we rely on an interdisciplinary team with extensive experience in creating customized enclosures. In addition, we offer the widest catalogue in the industry, featuring a great variety of models for you to choose from.



INNOVATION IS IN OUT DNA

Every year, our technical team focuses all their efforts and expertise on improving existing enclosures and developing new models for both pools and hot tubs. The result is a continuously evolving catalogue that expands and improves each year with innovative designs.

WHY INSTALL AN ABRISOL POOL ENCLOSURE?

Installing a pool enclosure like the ones we manufacture at Abrisol offers far more benefits than simply protecting your pool during the off-season. These structures help keep the water cleaner by preventing dust and leaves from entering the pool. They also extend the swimming season by increasing the water temperature by 8 to 10 °C, while providing a safety barrier that protects children and pets from accidental falls into the pool. Moreover, they reduce maintenance time, water consumption, and the use of chemical products—allowing you to enjoy your pool all year round.

Baño
Extend your swimming season with water temperatures up to 8–10 °C warmer.

Seguridad
Keep your loved ones safe by preventing accidents with children and pets.

Limpieza
Keep your pool cleaner by preventing dust, insects, soil, and leaves from getting in.

Ahorro económico
Reduce your expenses on cleaning, maintenance, energy, and water.

Garantía
Abrisol offers high-quality enclosures backed by a 10-year warranty.

STRUCTURE

All our enclosures are manufactured with high-quality materials such as powder-coated aluminium extruded at 500 °C. This material gives our enclosures excellent resistance to corrosion and UV light, outstanding durability, and extensive customisation options in terms of colour — always complying with the strictest European standards for safety and structural strength.

The structure of your enclosure can be of your desired colour, At Abrisol, we have all the colours from the RAL chart available, being the most requested ones by our clients the following:

RAL 7011 iron grey

RAL 9010 pure white

RAL 6009 fir green

You can also choose between glossy, matte, wood-effect, or even textured finishes to achieve the look you want.

This lacquer not only offers aesthetic advantages but also ensures long-term performance, providing a perfectly even thickness and excellent resistance to impact and external agents. In this way, it preserves the colour and gloss of your enclosure over time.

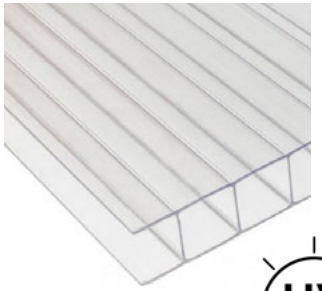
CLOSING SYSTEM

PC TRANSPARENT COMPACT POLYCARBONATE

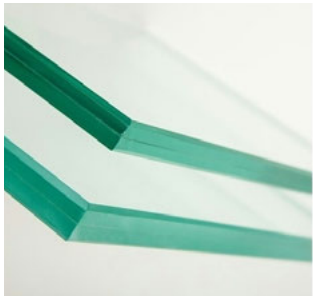
Transparent compact polycarbonate is a highly resistant thermoplastic with transparency similar to glass, but safer and lighter. Its excellent impact resistance makes it ideal for withstanding harsh weather conditions. It also provides protection against UV light, which prevents yellowing over time. Furthermore, it maintains its properties outdoors and can be cold-curved, offering versatility and an aesthetic appearance for enclosures and coverings.

AL ALVEOLAR POLYCARBONATE



Lighter yet highly efficient, alveolar polycarbonate features a multi-wall design that delivers outstanding thermal and acoustic insulation without adding weight. Durable and dependable, this material combines high impact strength with UV protection to prevent yellowing and deliver lasting performance outdoors. Its innovative structure makes it perfect for enclosures and coverings that require the ideal balance of strength, energy efficiency, and light weight.

GLASS



The perfect choice for those looking for a premium range of enclosures. We manufacture our enclosures with high-security laminated glass, which offers excellent strength, transparency, and an elegant appearance. We also offer double-glazed glass with an air gap, designed to improve thermal insulation and ensure better sealing against cold and extreme temperatures. A perfect blend of elegance and performance, delivering an exclusive, high-end finish for your enclosure.

TYPES OF ENCLOSURES

RETRACTABLE ENCLOSURES

Retractable enclosures are modular structures whose sections slide effortlessly over one another, allowing you to open or close your space whenever you wish. These enclosures offer great versatility, letting you enjoy an open or closed pool depending on your needs or the weather.

FIXED ENCLOSRUES

Fixed enclosures are, as their name suggests, structures anchored to the ground without a sliding system. These types of enclosures are usually high or mid-high, and their height allows you to comfortably enjoy the interior space without needing to open them, while still maintaining a sense of openness and connection to the outdoors.

LEAN-ON ENCLOSURES

All our high and mid-high enclosures, whether fixed or retractable, can be built as lean-on models if there is a wall near your pool. A lean-on enclosure — attached directly to a wall—allows you to make the most of the available space and create a direct connection between your home and pool. When installed against your house, it transforms the pool area into an additional living space.

HOW TO OBTAIN YOUR ABRISOL ENCLOSURE

Are you interested in one of our pool or spa enclosures? The process is simple — from the first contact to final installation, our team is with you every step of the way.

1 CONTACT

Get in touch with us or one of our authorized distributors. We'll visit your property to take precise measurements, understand your pool's characteristics, and identify your needs to offer the perfect solution.

2 PROJECT DESIGN

After you contact us or an authorized distributor and provide all the necessary information about your pool and needs, our technical team will create a personalized design made specifically for you.

3 MANUFACTURING

Once you approve the proposed design and estimate, we'll begin manufacturing your custom enclosure based on the blueprints you confirmed.

4 INSTALLATION

Once your enclosure is ready, you won't have to worry about a thing. Our logistics department will arrange a convenient date with you for delivery and installation.

5 AFTER-SALES SERVICE

After your enclosure is installed, our team will follow up to ensure that everything has been completed correctly. You'll also benefit from a 10-year warranty for your peace of mind.

TABARCA

Our **Clients' Favourite** Pool Enclosure

The Tabarca enclosure is a fixed structure with a simple design and excellent adaptability. As one of our first models, it remains a customer favourite. Although it cannot be opened like a retractable enclosure, it features an exclusive side trapdoor system with sliding and lifting panels that allow multiple openings, providing great ventilation and a sense of openness.

This model is **available in high, mid-high, and XXL versions**, the latter designed for collective-use pools.

ROTONDA TABARCA

The Tabarca model is compatible with our high-range module, the Rotonda. This module can be added to the ends of your pool enclosure, providing additional access thanks to its opening system, which functions as an extra door — similar to the sliding door used in the Sfera enclosure. The Rotonda module is ideal for curved-shaped pools or those with Roman Steps.

IBIZA

The Most Customisable Pool Enclosure

The design of this model may look familiar — the Ibiza enclosure is an evolution of the Tabarca model. It maintains all the same features and benefits, but with one key difference: the Ibiza is retractable, making it the model with the widest range of customisation options in our catalogue.

The Ibiza enclosure is **available exclusively as a high model**.

ROTONDA IBIZA

Like the Tabarca enclosure, the Ibiza model is also compatible with the Rotonda module, which can be added to the ends of the enclosure to provide an exclusive look while adding extra access to your pool.

COLUMBRETE

The High Enclosure **Designed around You**

The Columbrete enclosure is a fixed model with a simple yet elegant design, distinguished by its gable roof. It stands out for its exceptional accessibility — in addition to doors at both the front and back, a side door can be added to any module, providing excellent versatility and ventilation.

The Columbrete enclosure is **available exclusively as a high model.**

CAPRI

The **Retractable Version** of the **Columbrete Enclosure**

Sharing the same gable roof design as the Columbrete enclosure, the Capri is a retractable model that offers great flexibility and convenience of use. Its structure allows you to easily open and close the pool, enjoying a protected space in winter and an open one in summer. This model stands out for its excellent habitability, thanks to its height and spacious interior.

Compared to the Columbrete, the Capri offers more height options, as it is **available in high, mid-high, and low versions**.

LEAN-ON CAPRI

For pools located near a wall, the Capri enclosure can be installed as a lean-on model, making the most of the available space. Thanks to its retractable system, it can be opened or closed as needed, creating either an open, light-filled area or a closed, protected space.

PALMA

The Perfect Solution for Large Pools

The Palma enclosure is a retractable model featuring a five-angled roof, making it ideal for wide or large pools. Its geometric design provides excellent strength, making it a perfect option for pools located in areas with extreme weather conditions.

This model is a**vailable in high, mid-high, low, and XXL versions**, with the XXL featuring a seven-angled roof.

CORFU

The enclosure that fuses **design and spaciousness**

The Corfu enclosure is a retractable model with a modern design that combines straight lines with a curved roof, providing generous interior space. The modules slide smoothly along their rails, allowing you to easily open and close the pool, adapting perfectly to any moment or season.

Although this model is usually **manufactured as a high enclosure**, it is also **available as a mid-high version**.

HELIOS

A **sustainable and innovative solution** that doesn’t compromise on style

The Helios enclosure is a fixed model with a modern and elegant design. Its main feature is its pergola-like appearance, with clean, straight lines, and the possibility of installing photovoltaic panels on the roof. This allows you to generate your own energy and reduce electricity consumption for the pool’s cleaning, maintenance, and climate-control systems.

This model is **available** in a single height, **as a high enclosure**, but it can also be customized for hot tubs.

MALTA

Exceptional Comfort with a roomy interior

The Malta enclosure is a retractable model with a rounded design featuring three curves, providing a more spacious interior and allowing you to enjoy the pool in a cozy and open atmosphere.

This enclosure is **available in two heights** — **mid-high and low** — and **can also be acquired as a pre-assembled model**, a convenient option that helps reduce installation costs.

CHYPRE

The ideal enclosure for those seeking a **discreet and stylish solution**

The Chypre enclosure is a retractable model with a discreet and modern design, combining a curved roof with sloped sides. Its panels are made from a single folded compact polycarbonate sheet without corner profiles, offering a clean and elegant appearance.

Available only as a low enclosure, this structure has a height of over 60 centimetres, which can vary depending on the number of modules.

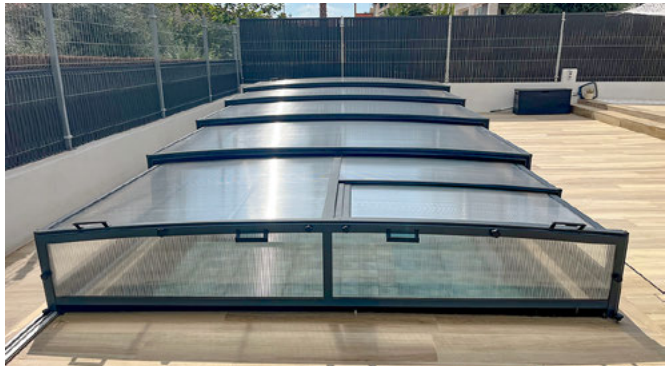
RETRACTABLE TAPIA

The best alternative to pool covers

The Retractable Tapia is, as its name suggests, a retractable pool enclosure model that stands out for its simplicity and ease of use. Its versatile design, with clean, straight lines, can adapt to any space and architectural style. It's a discreet enclosure, ideal for those who want to protect their pool without giving up the beautiful landscape views around their home.

This model is **available only as a low or flat enclosure and can also be purchased pre-assembled**, making it an even more affordable option.



LANZAROTE

The most unique enclosure in the catalogue

The Lanzarote enclosure is the most unique model in our catalogue, as it is the only lift-up enclosure we offer. This type of enclosure is made up of fixed modules that can be lifted sideways to allow access to the pool or even disassembled completely.

This model features a simple, discreet design that adapts easily to any type of space. Although it is **only available as a low enclosure**, we can make it partially retractable upon request.

FIXED TAPIA

The most cost-effective solution
from the Abrisol catalogue

The Tapia enclosure is a fixed, removable cover with a discreet design. Made up of several stackable modules, this enclosure must be removed to access the pool, making it ideal for those seeking a low-profile protective solution at the best price.

This model is **only available as a flat cover**, with a height not exceeding 30 centimetres.

SFERA

The best selling hot tub enclosure in the catalogue

The Sfera enclosure is our clients' favourite hot tub enclosure. Its success comes from its spherical design, which combines a fixed section with a retractable one that operates without ground rails, offering both convenience and elegance.

This enclosure is **available in two sizes — 3,500 mm or 3,900 mm in diameter** — to suit different needs. In addition, a motor can be added for an even more convenient and practical opening and closing system.

VISION

The latest model added to the catalogue

The Vision enclosure is the newest model in our catalogue. It is a fixed hot tub enclosure with a semicircular silhouette, featuring an arch-shaped structure and a cover made of 100% compact transparent polycarbonate, providing a panoramic view of the surroundings while you enjoy your hot tub.

In addition to the main access at both the front and back, this model offers the option of integrating a side trapdoor in one or all of the modules, creating a sense of spaciousness and better integration with the surroundings.

TABARCA SPA

Our clients' favourite pool enclosure model can be adapted to protect your jacuzzi too. By reducing the size of our signature enclosure, we allow our clients to protect their hot tub while enjoying it for more days throughout the year.

HELIOS SPA

Another enclosure adaptation for hot tubs is the Helios, which, with the option to add solar panels, will help you reduce the energy consumption of your hot tub, generating direct savings on your electricity bill.

LARGE POOL ENCLOSURE

At Abrisol, we don’t only manufacture enclosures for single-family pools; we also have the capacity to adapt enclosures to the required size, regardless of the pool’s location, whether it is a sports centre or a hotel. For these types of enclosures, we use a high-resistance aluminium alloy with excellent corrosion resistance, always meeting the security regulations required for establishments open to the public.

Among the models that can be adapted to this size, **you will find the Tabarca XXL and the Palma XXL.**

CUSTOMISATION OPTIONS

At Abrisol, we know that each project is unique and that no one knows your needs better than you. That's why we provide 100% customized solutions, fully adapted to your taste and lifestyle, ensuring an enclosure that perfectly meets your requirements.
